

experience baby CURRICULUM

Your child will participate in a nationally recognized education program that is designed uniquely for infants from birth to 18 months. Experience Baby Curriculum is an infant curriculum that supports relationship-based play and discovery. As your child participates in this program, they will:

- **Build emotional connections** that are key for developmental growth.
- Have access to specialized **sensory tools** and toys that invite them to explore and make sense of their environment.
- Engage in playful activities that stimulate their brain and support their development of **23 foundational skills**.

Individualized Play and Learning for Continued Growth

Your child's teacher will use books, puppets, music and toys to help your child develop the 23 foundational skills connected to emotional, language, physical and cognitive development. As your child grows, the Experience Baby Curriculum helps the teacher individualize the experience and increase the challenge so that your child is constantly learning at their unique pace.

Early Learning Continuum of Skills
for Infants and Toddlers

Child development is a dynamic and fluid process, and each child develops at their own unique pace. The Continuum of Skills is a general guide to what children are typically able to do at various ages. It is not a checklist of skills that every child must have at a certain age.

	Young Infant	Older Infant	Young Toddler
CONNECT & COMMUNICATE			
SOcial-EMOTIONAL DEVELOPMENT			
SEI 1 Self-Awareness	Identify self, others, objects, body and emotions	Recognize and express basic emotions	Express a range of emotions and recognize the emotions of others

LEI 4 Alphabetical Knowledge	Recognize and play with letters	Recognize and play with letters	Recognize and play with letters
LEI 5 Concepts of Print	Recognize and play with print	Recognize and play with print	Recognize and play with print
LEI 6 Reading	Engage in shared reading	Engage in shared reading	Engage in shared reading

Beyond Bottles and Diapers: A Full Infant Education Program

Beyond the typical bottle and diaper tracking, you will receive a daily journal where you will see which activities your child engaged with and learn about the skills they gained throughout the day from the purposeful play.

Your child's brain doubles in size during their first year and is at 90% of its adult size by age 5. Research has shown that the quality of a child's experiences in the first few years significantly shapes how their brains develop into adulthood.

It is the goal of Experience Baby Curriculum to build meaningful shared experiences between infants and nurturing adults. To ensure that your child benefits from the latest teaching methods and the highest quality tools for hands-on learning, your child's teacher receives a new Experience Baby Teaching Kit every month. Each month features a new theme and 36 play-based activities to explore with your child.

With Experience Baby Curriculum, your child will be busy learning from birth through 18 months!
